Index		37

1 Namespace Index

1.1 Namespace List

Here is a list of all namespaces with brief descriptions:

graphs	4
graphs.models	4
graphs.views	4
ocr	5
ocr.models	5
ocr.views	5
SI_proj	5
SI_proj.models	5
SI_proj.views	6
split	7
split.models	7
split.views	7
txn	8
txn.models	8
txn.views	9

2 Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Form

txn.views.FileUploadForm	10
--	----

Model

SI_proj.models.Profile	18
--	----

split.models.Group	11
------------------------------------	----

split.models.GroupTransaction	16
---	----

txn.models.Transaction	20
--	----

CreateView

split.views.GroupCreate	13
---	----

split.views.TransCreate	27
txn.views.TransactionCreate	22
DeleteView	
split.views.GroupDelete	15
txn.views.TransactionDelete	24
UpdateView	
txn.views.TransactionUpdate	25
View	
SI_proj.views.UserLoginFormView	28
SI_proj.views.UserSignupFormView	30

3 Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

txn.views.FileUploadForm	10
split.models.Group	
Defines the structure of the table used for storing Group	11
split.views.GroupCreate	
creates new entry in Group table	13
split.views.GroupDelete	
removes a Group entry from the table	15
split.models.GroupTransaction	
Defines the structure of the table used for storing GroupTransaction	16
SI_proj.models.Profile	
Defines the structure of the table used for storing User Profile	18
txn.models.Transaction	
Defines the structure of the table used for storing Transaction	20
txn.views.TransactionCreate	
creates new entry in transaction table	22
txn.views.TransactionDelete	
removes a transaction entry from the table	24
txn.views.TransactionUpdate	
updates pre-existing transaction	25
split.views.TransCreate	
adds Transaction detail in a Group as a whole as well in each of the participant ledger	27
SI_proj.views.UserLoginFormView	
Login for User	28

SI_proj.views.UserSignupFormView SignUp for User	30
---	----

4 File Index

4.1 File List

Here is a list of all files with brief descriptions:

graphs/models.py	32
graphs/views.py	33
ocr/models.py	32
ocr/views.py	33
SI_proj/models.py	32
SI_proj/views.py	33
split/models.py	32
split/views.py	34
txn/models.py	33
txn/views.py	34

5 Namespace Documentation

5.1 graphs Namespace Reference

Namespaces

- [models](#)
- [views](#)

5.2 graphs.models Namespace Reference

5.3 graphs.views Namespace Reference

Functions

- def [analysis](#) (request)
graphical visualization Extract the information of logged in user and calculate its expenditure in each domain

5.3.1 Function Documentation

5.3.1.1 analysis()

```
def graphs.views.analysis (
    request )
```

graphical visualization Extract the information of logged in user and calculate its expenditure in each domain

Returns

path to analysis page along with expenditure for each category

5.4 ocr Namespace Reference

Namespaces

- [models](#)
- [views](#)

5.5 ocr.models Namespace Reference

5.6 ocr.views Namespace Reference

Functions

- def [ocr](#) (request)

5.6.1 Function Documentation

5.6.1.1 ocr()

```
def ocr.views.ocr (
    request )
```

5.7 SI_proj Namespace Reference

Namespaces

- [models](#)
- [views](#)

5.8 SI_proj.models Namespace Reference

Classes

- class [Profile](#)
Defines the structure of the table used for storing User [Profile](#)

5.9 Sl_proj.views Namespace Reference

Classes

- class [UserLoginFormView](#)
Login for User
- class [UserSignupFormView](#)
SignUp for User

Functions

- def [home](#) (request)
Landing page.
- def [user_logout](#) (request)
end the sessions for a User
- def [profile](#) (request)
User profile description

5.9.1 Function Documentation

5.9.1.1 [home\(\)](#)

```
def Sl_proj.views.home (  
    request )
```

Landing page.

5.9.1.2 [profile\(\)](#)

```
def Sl_proj.views.profile (  
    request )
```

User profile description

Returns

path to profile page along with profile information

5.9.1.3 [user_logout\(\)](#)

```
def Sl_proj.views.user_logout (  
    request )
```

end the sessions for a User

Returns

path to home page

5.10 split Namespace Reference

Namespaces

- [models](#)
- [views](#)

5.11 split.models Namespace Reference

Classes

- class [Group](#)
Defines the structure of the table used for storing [Group](#).
- class [GroupTransaction](#)
Defines the structure of the table used for storing [GroupTransaction](#).

5.12 split.views Namespace Reference

Classes

- class [GroupCreate](#)
creates new entry in [Group](#) table
- class [GroupDelete](#)
removes a [Group](#) entry from the table
- class [TransCreate](#)
adds Transaction detail in a [Group](#) as a whole as well in each of the participant ledger.

Functions

- def [optimize](#) (request, pk)
Optimizes cash-flow in a [Group](#)
- def [settle](#) (request, pk)
settles debt
- def [groups](#) (request)
shows the [Group](#) in which User is enrolled

5.12.1 Function Documentation

5.12.1.1 groups()

```
def split.views.groups (  
    request )
```

shows the [Group](#) in which User is enrolled

Returns

path to mygroups page

5.12.1.2 `optimize()`

```
def split.views.optimize (
    request,
    pk )
```

Optimizes cash-flow in a Group

Returns

path to group transaction page along with summary of GroupTransaction

5.12.1.3 `settle()`

```
def split.views.settle (
    request,
    pk )
```

settles debt

Returns

path to Group page

5.13 `txn` Namespace Reference

Namespaces

- [models](#)
- [views](#)

5.14 `txn.models` Namespace Reference

Classes

- class [Transaction](#)
Defines the structure of the table used for storing [Transaction](#).

Variables

- tuple [CATEGORY_CHOICES](#)

5.14.1 Variable Documentation

5.14.1.1 CATEGORY_CHOICES

```
tuple txn.models.CATEGORY_CHOICES
```

Initial value:

```
1 = (('Food', 'Food'), ('Shopping', 'Shopping'), ('Health and Fitness', 'Health and Fitness'), (
2   'Entertainment', 'Entertainment'), ('Travel', 'Travel'), ('Rent', 'Rent'), ('Gifts', 'Gifts'), ('Other'
   , 'Other'))
```

5.15 txn.views Namespace Reference

Classes

- class [FileUploadForm](#)
- class [TransactionCreate](#)
creates new entry in transaction table
- class [TransactionDelete](#)
removes a transaction entry from the table
- class [TransactionUpdate](#)
updates pre-existing transaction

Functions

- def [crop_ocr](#) (request)
handles AJAX request and applies OCR on image
- def [index](#) (request)
extracts transaction information of logged in user
- def [detail](#) (request, pk)
information about particular transaction

5.15.1 Function Documentation

5.15.1.1 crop_ocr()

```
def txn.views.crop_ocr (
    request )
```

handles AJAX request and applies OCR on image

Returns

String amount-detail of the receipts

5.15.1.2 detail()

```
def txn.views.detail (
    request,
    pk )
```

information about particular transaction

Returns

complete transaction detail or Error page

5.15.1.3 index()

```
def txn.views.index (
    request )
```

extracts transaction information of logged in user

Returns

path to ledger page along with user transaction details

6 Class Documentation

6.1 txn.views.FileUploadForm Class Reference

Inheritance diagram for txn.views.FileUploadForm:

Collaboration diagram for `txn.views.FileUploadForm`:

Static Public Attributes

- `file_source` = `forms.FileField()`

6.1.1 Member Data Documentation

6.1.1.1 file_source

```
txn.views.FileUploadForm.file_source = forms.FileField() [static]
```

The documentation for this class was generated from the following file:

- `txn/views.py`

6.2 split.models.Group Class Reference

Defines the structure of the table used for storing `Group`.

Inheritance diagram for `split.models.Group`:

Collaboration diagram for `split.models.Group`:

Public Member Functions

- `def __str__ (self)`
function which returns summary for a particular [Group](#)
- `def get_absolute_url (self)`
function which redirects to [Group](#) page

Static Public Attributes

- `gname = models.CharField(max_length=40)`
- `participants = models.ManyToManyField(User)`

6.2.1 Detailed Description

Defines the structure of the table used for storing [Group](#).

6.2.2 Member Function Documentation

6.2.2.1 `__str__()`

```
def split.models.Group.__str__ (
    self )
```

function which returns summary for a particular [Group](#)

Returns

String [Group](#) name

6.2.2.2 get_absolute_url()

```
def split.models.Group.get_absolute_url (
    self )
```

function which redirects to [Group](#) page

Returns

path to [Group](#) page

6.2.3 Member Data Documentation

6.2.3.1 gname

```
split.models.Group.gname = models.CharField(max_length=40) [static]
```

6.2.3.2 participants

```
split.models.Group.participants = models.ManyToManyField(User) [static]
```

The documentation for this class was generated from the following file:

- [split/models.py](#)

6.3 split.views.GroupCreate Class Reference

creates new entry in Group table

Inheritance diagram for split.views.GroupCreate:

Collaboration diagram for split.views.GroupCreate:

Public Member Functions

- def `form_valid` (self, form)

Static Public Attributes

- `model` = `Group`
- list `fields` = ['gname', 'participants']

6.3.1 Detailed Description

creates new entry in Group table

6.3.2 Member Function Documentation

6.3.2.1 `form_valid()`

```
def split.views.GroupCreate.form_valid (  
    self,  
    form )
```

6.3.3 Member Data Documentation

6.3.3.1 `fields`

```
list split.views.GroupCreate.fields = ['gname', 'participants'] [static]
```

6.3.3.2 model

```
split.views.GroupCreate.model = Group [static]
```

The documentation for this class was generated from the following file:

- [split/views.py](#)

6.4 split.views.GroupDelete Class Reference

removes a Group entry from the table

Inheritance diagram for split.views.GroupDelete:

Collaboration diagram for split.views.GroupDelete:

Static Public Attributes

- `model` = [Group](#)
- `success_url` = `reverse_lazy('groups')`

6.4.1 Detailed Description

removes a Group entry from the table

6.4.2 Member Data Documentation

6.4.2.1 model

```
split.views.GroupDelete.model = Group [static]
```

6.4.2.2 success_url

```
split.views.GroupDelete.success_url = reverse_lazy('groups') [static]
```

The documentation for this class was generated from the following file:

- [split/views.py](#)

6.5 split.models.GroupTransaction Class Reference

Defines the structure of the table used for storing [GroupTransaction](#).

Inheritance diagram for split.models.GroupTransaction:

Collaboration diagram for split.models.GroupTransaction:

Public Member Functions

- `def __str__(self)`
function which returns summary for a transaction in a [Group](#)

Static Public Attributes

- `owe` = `models.ForeignKey(User, on_delete=models.CASCADE, related_name='owe')`
- `ewo` = `models.ForeignKey(User, on_delete=models.CASCADE, related_name='ewo')`
- `amount` = `models.FloatField()`
- `gname` = `models.ForeignKey(Group, on_delete=models.CASCADE)`

6.5.1 Detailed Description

Defines the structure of the table used for storing [GroupTransaction](#).

6.5.2 Member Function Documentation

6.5.2.1 __str__()

```
def split.models.GroupTransaction.__str__(  
    self )
```

function which returns summary for a transaction in a [Group](#)

Returns

String Borrower-Amount-Lender-Group Name

6.5.3 Member Data Documentation

6.5.3.1 amount

```
split.models.GroupTransaction.amount = models.FloatField() [static]
```

6.5.3.2 ewo

```
split.models.GroupTransaction.ewo = models.ForeignKey(User, on_delete=models.CASCADE, related←  
_name='ewo') [static]
```

6.5.3.3 gname

```
split.models.GroupTransaction.gname = models.ForeignKey(Group, on_delete=models.CASCADE) [static]
```

6.5.3.4 owe

```
split.models.GroupTransaction.owe = models.ForeignKey(User, on_delete=models.CASCADE, related←  
_name='owe') [static]
```

The documentation for this class was generated from the following file:

- [split/models.py](#)

6.6 SI_proj.models.Profile Class Reference

Defines the structure of the table used for storing User [Profile](#)

Inheritance diagram for SI_proj.models.Profile:

Collaboration diagram for SI_proj.models.Profile:

Static Public Attributes

- `user` = `models.OneToOneField(User, on_delete=models.CASCADE)`
- `First_Name` = `models.CharField(max_length=30)`
- `Last_Name` = `models.CharField(max_length=30)`
- `Annual_Income` = `models.FloatField(null=True, blank=True)`
- `Mobile_Number` = `models.CharField(max_length=10)`
- `Profile_Picture` = `models.FileField(blank=True)`

6.6.1 Detailed Description

Defines the structure of the table used for storing User [Profile](#)

6.6.2 Member Data Documentation

6.6.2.1 Annual_Income

```
Sl_proj.models.Profile.Annual_Income = models.FloatField(null=True, blank=True) [static]
```

6.6.2.2 First_Name

```
Sl_proj.models.Profile.First_Name = models.CharField(max_length=30) [static]
```

6.6.2.3 Last_Name

```
Sl_proj.models.Profile.Last_Name = models.CharField(max_length=30) [static]
```

6.6.2.4 Mobile_Number

```
Sl_proj.models.Profile.Mobile_Number = models.CharField(max_length=10) [static]
```

6.6.2.5 Profile_Picture

```
Sl_proj.models.Profile.Profile_Picture = models.FileField(blank=True) [static]
```

6.6.2.6 user

```
Sl_proj.models.Profile.user = models.OneToOneField(User, on_delete=models.CASCADE) [static]
```

The documentation for this class was generated from the following file:

- [Sl_proj/models.py](#)

6.7 txn.models.Transaction Class Reference

Defines the structure of the table used for storing [Transaction](#).

Inheritance diagram for txn.models.Transaction:

Collaboration diagram for txn.models.Transaction:

Public Member Functions

- def [getr_absolute_url](#) (self)
function which redirects to index page
- def [__str__](#) (self)
function which returns summary for a particular [Transaction](#)

Static Public Attributes

- `details` = `models.CharField(max_length=100)`
- `amount` = `models.FloatField()`
- `category` = `models.CharField(max_length=18, choices=CATEGORY_CHOICES)`
- `user` = `models.ForeignKey(User, on_delete=models.PROTECT)`
- `bill` = `models.FileField(blank=True)`
- `timestamp` = `models.DateTimeField(auto_now=True)`

6.7.1 Detailed Description

Defines the structure of the table used for storing [Transaction](#).

6.7.2 Member Function Documentation

6.7.2.1 `__str__()`

```
def txn.models.Transaction.__str__ (
    self )
```

function which returns summary for a particular [Transaction](#)

Returns

String [Transaction](#) details and amount

6.7.2.2 `getr_absolute_url()`

```
def txn.models.Transaction.getr_absolute_url (
    self )
```

function which redirects to index page

Returns

path to index page

6.7.3 Member Data Documentation

6.7.3.1 `amount`

```
txn.models.Transaction.amount = models.FloatField() [static]
```

6.7.3.2 bill

```
txn.models.Transaction.bill = models.FileField(blank=True) [static]
```

6.7.3.3 category

```
txn.models.Transaction.category = models.CharField(max_length=18, choices=CATEGORY_CHOICES) [static]
```

6.7.3.4 details

```
txn.models.Transaction.details = models.CharField(max_length=100) [static]
```

6.7.3.5 timestamp

```
txn.models.Transaction.timestamp = models.DateTimeField(auto_now=True) [static]
```

6.7.3.6 user

```
txn.models.Transaction.user = models.ForeignKey(User, on_delete=models.PROTECT) [static]
```

The documentation for this class was generated from the following file:

- [txn/models.py](#)

6.8 txn.views.TransactionCreate Class Reference

creates new entry in transaction table

Inheritance diagram for `txn.views.TransactionCreate`:

Collaboration diagram for txn.views.TransactionCreate:

Public Member Functions

- def `form_valid` (self, form)
validated transaction form

Static Public Attributes

- `model` = `Transaction`
- list `fields` = ['bill', 'details', 'amount', 'category']

6.8.1 Detailed Description

creates new entry in transaction table

6.8.2 Member Function Documentation

6.8.2.1 `form_valid()`

```
def txn.views.TransactionCreate.form_valid (
    self,
    form )
```

validated transaction form

6.8.3 Member Data Documentation

6.8.3.1 fields

```
list txn.views.TransactionCreate.fields = ['bill', 'details', 'amount', 'category'] [static]
```

6.8.3.2 model

```
txn.views.TransactionCreate.model = Transaction [static]
```

The documentation for this class was generated from the following file:

- [txn/views.py](#)

6.9 txn.views.TransactionDelete Class Reference

removes a transaction entry from the table

Inheritance diagram for txn.views.TransactionDelete:

Collaboration diagram for txn.views.TransactionDelete:

Static Public Attributes

- `model` = [Transaction](#)
- `success_url` = `reverse_lazy('index')`

6.9.1 Detailed Description

removes a transaction entry from the table

6.9.2 Member Data Documentation

6.9.2.1 model

```
txn.views.TransactionDelete.model = Transaction [static]
```

6.9.2.2 success_url

```
txn.views.TransactionDelete.success_url = reverse_lazy('index') [static]
```

The documentation for this class was generated from the following file:

- [txn/views.py](#)

6.10 txn.views.TransactionUpdate Class Reference

updates pre-existing transaction

Inheritance diagram for `txn.views.TransactionUpdate`:

Collaboration diagram for `txn.views.TransactionUpdate`:

Static Public Attributes

- `model` = [Transaction](#)
- list `fields` = ['details', 'amount', 'category', 'bill']

6.10.1 Detailed Description

updates pre-existing transaction

6.10.2 Member Data Documentation

6.10.2.1 fields

```
list txn.views.TransactionUpdate.fields = ['details', 'amount', 'category', 'bill'] [static]
```

6.10.2.2 model

```
txn.views.TransactionUpdate.model = Transaction [static]
```

The documentation for this class was generated from the following file:

- [txn/views.py](#)

6.11 split.views.TransCreate Class Reference

adds Transaction detail in a Group as a whole as well in each of the participant ledger.

Inheritance diagram for split.views.TransCreate:

Collaboration diagram for split.views.TransCreate:

Public Member Functions

- def `form_valid` (self, form, kwargs)

Static Public Attributes

- `model` = `Transaction`
- list `fields` = ['details', 'amount', 'category', 'bill']

6.11.1 Detailed Description

adds Transaction detail in a Group as a whole as well in each of the participant ledger.

6.11.2 Member Function Documentation

6.11.2.1 form_valid()

```
def split.views.TransCreate.form_valid (
    self,
    form,
    kwargs )
```

6.11.3 Member Data Documentation

6.11.3.1 fields

```
list split.views.TransCreate.fields = ['details', 'amount', 'category', 'bill'] [static]
```

6.11.3.2 model

```
split.views.TransCreate.model = Transaction [static]
```

The documentation for this class was generated from the following file:

- [split/views.py](#)

6.12 SI_proj.views.UserLoginFormView Class Reference

Login for User

Inheritance diagram for SI_proj.views.UserLoginFormView:

Collaboration diagram for SI_proj.views.UserLoginFormView:

Public Member Functions

- def `get` (self, request)
- def `post` (self, request)

Static Public Attributes

- `user_form_class` = `UserLoginForm`
- string `template_name` = `'registration/login_form.html'`

6.12.1 Detailed Description

Login for User

6.12.2 Member Function Documentation

6.12.2.1 `get()`

```
def SI_proj.views.UserLoginFormView.get (
    self,
    request )
```

6.12.2.2 `post()`

```
def SI_proj.views.UserLoginFormView.post (
    self,
    request )
```

6.12.3 Member Data Documentation

6.12.3.1 `template_name`

```
string Sl_proj.views.UserLoginFormView.template_name = 'registration/login_form.html' [static]
```

6.12.3.2 `user_form_class`

```
Sl_proj.views.UserLoginFormView.user_form_class = UserLoginForm [static]
```

The documentation for this class was generated from the following file:

- [Sl_proj/views.py](#)

6.13 `Sl_proj.views.UserSignupFormView` Class Reference

SignUp for User

Inheritance diagram for `Sl_proj.views.UserSignupFormView`:

Collaboration diagram for `Sl_proj.views.UserSignupFormView`:

Public Member Functions

- def `get` (self, request)
- def `post` (self, request)

Static Public Attributes

- `user_form_class` = UserSignupForm
- `profile_form_class` = ProfileForm
- string `template_name` = 'registration/registration_form.html'

6.13.1 Detailed Description

SignUp for User

6.13.2 Member Function Documentation

6.13.2.1 `get()`

```
def Sl_proj.views.UserSignupFormView.get (  
    self,  
    request )
```

6.13.2.2 `post()`

```
def Sl_proj.views.UserSignupFormView.post (  
    self,  
    request )
```

6.13.3 Member Data Documentation

6.13.3.1 `profile_form_class`

```
Sl_proj.views.UserSignupFormView.profile_form_class = ProfileForm [static]
```

6.13.3.2 `template_name`

```
string Sl_proj.views.UserSignupFormView.template_name = 'registration/registration_form.html'  
[static]
```

6.13.3.3 user_form_class

```
Sl_proj.views.UserSignupFormView.user_form_class = UserSignupForm [static]
```

The documentation for this class was generated from the following file:

- [Sl_proj/views.py](#)

7 File Documentation

7.1 graphs/models.py File Reference

Namespaces

- [graphs.models](#)

7.2 ocr/models.py File Reference

Namespaces

- [ocr.models](#)

7.3 Sl_proj/models.py File Reference

Classes

- class [Sl_proj.models.Profile](#)
Defines the structure of the table used for storing User [Profile](#)

Namespaces

- [Sl_proj.models](#)

7.4 split/models.py File Reference

Classes

- class [split.models.Group](#)
Defines the structure of the table used for storing [Group](#).
- class [split.models.GroupTransaction](#)
Defines the structure of the table used for storing [GroupTransaction](#).

Namespaces

- [split.models](#)

7.5 txn/models.py File Reference

Classes

- class [txn.models.Transaction](#)
Defines the structure of the table used for storing [Transaction](#).

Namespaces

- [txn.models](#)

Variables

- tuple [txn.models.CATEGORY_CHOICES](#)

7.6 graphs/views.py File Reference

Namespaces

- [graphs.views](#)

Functions

- def [graphs.views.analysis](#) (request)
graphical visualization Extract the information of logged in user and calculate its expenditure in each domain

7.7 ocr/views.py File Reference

Namespaces

- [ocr.views](#)

Functions

- def [ocr.views.ocr](#) (request)

7.8 SI_proj/views.py File Reference

Classes

- class [SI_proj.views.UserSignupFormView](#)
SignUp for User
- class [SI_proj.views.UserLoginFormView](#)
Login for User

Namespaces

- [SI_proj.views](#)

Functions

- def [SI_proj.views.home](#) (request)
Landing page.
- def [SI_proj.views.user_logout](#) (request)
end the sessions for a User
- def [SI_proj.views.profile](#) (request)
User profile description

7.9 split/views.py File Reference

Classes

- class [split.views.GroupCreate](#)
creates new entry in Group table
- class [split.views.GroupDelete](#)
removes a Group entry from the table
- class [split.views.TransCreate](#)
adds Transaction detail in a Group as a whole as well in each of the participant ledger.

Namespaces

- [split.views](#)

Functions

- def [split.views.optimize](#) (request, pk)
Optimizes cash-flow in a Group
- def [split.views.settle](#) (request, pk)
settles debt
- def [split.views.groups](#) (request)
shows the Group in which User is enrolled

7.10 txn/views.py File Reference

Classes

- class [txn.views.FileUploadForm](#)
- class [txn.views.TransactionCreate](#)
creates new entry in transaction table
- class [txn.views.TransactionUpdate](#)
updates pre-existing transaction
- class [txn.views.TransactionDelete](#)
removes a transaction entry from the table

Namespaces

- [txn.views](#)

Functions

- def [txn.views.crop_ocr](#) (request)
handles AJAX request and applies OCR on image
- def [txn.views.index](#) (request)
extracts transaction information of logged in user
- def [txn.views.detail](#) (request, pk)
information about particular transaction
